SUMMARY

Full-stack developer with 9 months of hands-on Python and Django experience building and deploying REST APIs, PostgreSQL-backed applications, and React frontends. Four projects live in production. Background in AI/ML tooling (LangChain, RAG, OpenAI API) gives me an edge integrating modern features into real backends. Looking for a junior full-stack or backend role where I can ship quickly and keep learning. Open to remote.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Django REST Framework, SQL
AI & ML Tools: LangChain, LangGraph, OpenAI API, Pydantic, RAG pipelines, Vector databases (ChromaDB)
Databases & Tools: PostgreSQL, SQLite, Git, GitHub, REST APIs, UV
Data analysis: https://github.com/jemrich18/end-to-end-finance-data-analysis

PROJECTS

Job Application Assistant | Django · RAG · Railway · pdfplumber· OpenAI · Railway

- An AI-powered RAG application that analyzes your resume against job descriptions, scores your match Deployed live at https://www.fitformyrole.com

Hunting AI Assistant | Django · LangGraph · Railway

- Agent that routes hunting queries through a structured knowledge base. Deployed on Railway. (2026) Deployed live at https://web-production-d654e.up.railway.app

Archery Answers | Django · PostgreSQL

- Built an arrow ballistic calculator tool. Allows archers to play with different weights of arrows and componenets to find the perfect build for their hunting goals. Allows archers to save builds and produces real results for their unique setups.
- Deployed live at https://archeryanswers-production.up.railway.app/

Budget App | Django · DRF · React · PostgreSQL · Railway

- Built a full-stack budget application with a Django REST Framework backend and React frontend
- Implemented token authentication, serializers, full CRUD operations, and deployed to Railway with PostgreSQL
- Live demo: budgetappreactdrf-production.up.railway.app

GolfBros | Django REST Framework · React · PostgreSQL · Railway

- Built a full-stack golf blog with a DRF backend and React frontend including user authentication and full CRUD
- Deployed to Railway with PostgreSQL — live at www.golfbros.org

The Weather Rack | Django · Open-Meteo API · PostgreSQL

- Built a weather tool that pulls 10-day forecast data from Open-Meteo and calculates optimal hunting dates based on conditions
- Deployed live at www.theweatherrack.com

Developer Portfolio | Django · Railway

- Personal portfolio site built and deployed in Django showcasing projects, skills, and contact information
- Live at www.jemrich.dev

EDUCATION

Bachelor of Science, Computer Science — University of Maryland Global Campus In Progress

Associate of Applied Science — WSU Tech 2019 – 2021
