

JEREMIAH EMRICH

Backend Developer — Python / Django

Haven, KS (Open to Remote) · jemrich.dev · github.com/jemrich18 · linkedin.com/in/jeremiah-emrich-064bb0391

PROFESSIONAL SUMMARY

Self-driven backend developer specializing in Python and Django, with 11 deployed production applications built and maintained independently. Core strength in Django REST Framework, PostgreSQL, and real-time backend architecture using Django Channels, WebSockets, and Redis. Delivered a live client booking platform end-to-end — requirements through deployment — and has shipped production AI/LLM integrations (RAG pipelines, LangGraph agents) as an additional area of depth. FAA-certified Airframe mechanic background adds discipline in safety-critical systems and precision documentation. Seeking a remote backend, Python, or Django role.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML, CSS

Backend: Django, Django REST Framework, REST API design, PostgreSQL, SQLite, JWT/token auth, Django Channels, WebSockets, Redis, server-side architecture

Frontend: React, Vite, responsive UI, data visualization, Streamlit

Infrastructure: Railway, Docker, AWS, Git, GitHub Actions, CI/CD pipelines

Testing: pytest, unit testing, test planning

AI / LLM: LangChain, LangGraph, OpenAI API, RAG pipelines, ChromaDB, vector search, prompt engineering

Data: Pandas, NumPy, Scikit-learn, Plotly, Jupyter Notebook

AI Dev Tools: Claude Code, GitHub Copilot, Cursor

EXPERIENCE

Freelance Backend Developer | Self-Employed 2025 – Present

- Designed and delivered a full-stack booking platform for a paying client (erintheestie.com) — custom appointment system with approval workflow, service menu management, and mobile-optimized admin dashboard
- Owned the full SDLC: requirements gathering, iterative delivery, database schema design, server-side logic, Gmail SMTP notification integration, and ongoing maintenance
- Deployed to Railway with custom domain and PostgreSQL; collaborated directly with client to align features with real-world business needs and manage feedback cycles

PROJECTS

Budget App — Django REST Framework · React · PostgreSQL · Railway · Jan–Mar 2026

- Full-stack personal finance tracker — DRF backend with REST API, JWT token auth, and full CRUD endpoints; React frontend with expense visualization and chart breakdowns
- Includes pytest unit test suite and GitHub Actions CI/CD pipeline; continuously deployed to Railway

GolfBros — Django REST Framework · React · PostgreSQL · Railway · Feb 2026

- Full-stack golf community platform at golfbros.org — players log rounds, share course reviews, and track performance; DRF backend with user authentication and full CRUD, React frontend with integrated server-side logic

WeatherRack — Django · Open-Meteo API · PostgreSQL · Railway · Mar 2026

- Integrated Open-Meteo REST API with multi-variable scoring logic across wind, barometric pressure, temperature, and moon phase to rank optimal hunting days; live at theweatherrack.com
- Full location management, responsive dark-mode UI, Railway deployment with custom domain and PostgreSQL backend

FAA Aviation Incident Dashboard — Python · Pandas · Plotly · Streamlit · May 2026

- Built an interactive analytics dashboard analyzing 39,000+ NTSB aviation incident records — dynamic filters, KPI metrics, trend analysis, and a US choropleth map, informed by domain expertise as an FAA-certified A&P mechanic

Job Application Assistant (AI) — Django · LangChain · OpenAI · ChromaDB · Railway · Apr 2026

- Built and shipped a production RAG application at fitformyrole.com — users upload a resume and job posting to receive a match score, skill gap analysis, and a GPT-4o-mini generated cover letter with structured output

- Architected full LLM pipeline: PDF parsing, vector embeddings, ChromaDB retrieval, and OpenAI completion, deployed behind a REST API

Hunting AI Assistant (AI Agent) — *Django · LangGraph · LangChain · OpenAI · Railway · Apr 2026*

- Engineered a LangGraph state machine agent at aihuntingchat.com routing plain-English queries across 10+ topic domains — live weather tools, vector-store knowledge base Q&A, and persistent conversation memory
- Designed hallucination-prevention architecture for regulation-sensitive hunting topics; production agentic AI system deployed and maintained independently end to end

EDUCATION

B.S., Computer Science | University of Maryland Global Campus *Expected 2027*

Relevant coursework: Algorithms, Data Structures, Databases, Software Engineering

A.A.S. — FAA Certified Airframe Mechanic | WSU Tech *2019 – 2021*

FAA Airframe & Powerplant (A&P) Certificate — safety-critical systems, technical documentation, precision diagnostics
