SUMMARY

Full-stack developer with 9 months of hands-on Python and Django experience building and deploying REST APIs, PostgreSQL-backed applications, and React frontends. Four projects live in production. Background in AI/ML tooling (LangChain, RAG, OpenAI API) gives me an edge integrating modern features into real backends. Looking for a junior full-stack or backend role where I can ship quickly and keep learning. Open to remote.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Django REST Framework, SQL
AI & ML Tools: LangChain, LangGraph, OpenAI API, Pydantic, RAG pipelines, Vector databases (ChromaDB)
Databases & Tools: PostgreSQL, SQLite, Git, GitHub, REST APIs, UV
Data analysis: https://github.com/jemrich18/end-to-end-finance-data-analysis

PROJECTS

AI Automation Agent | LangGraph · Django REST · OpenAI · Pydantic · Open-Meteo

- Built a LangGraph-powered agent that routes plain-English requests to the correct tool automatically — live weather, math evaluation, and knowledge base search
- Wrapped the agent in a Django REST API endpoint with session-based conversation memory via MemorySaver and thread IDs
- Implemented Pydantic input validation on all tools and a conditional routing graph that loops until the agent has enough to answer
- GitHub: github.com/jemrich18/Ai_agent

Budget App | Django · DRF · React · PostgreSQL · Railway

- Built a full-stack budget application with a Django REST Framework backend and React frontend
- Implemented token authentication, serializers, full CRUD operations, and deployed to Railway with PostgreSQL
- Live demo: budgetappreactdrf-production.up.railway.app

GolfBros | Django REST Framework · React · PostgreSQL · Railway

- Built a full-stack golf blog with a DRF backend and React frontend including user authentication and full CRUD
- Deployed to Railway with PostgreSQL — live at www.golfbros.org

The Weather Rack | Django · Open-Meteo API · PostgreSQL

- Built a weather tool that pulls 10-day forecast data from Open-Meteo and calculates optimal hunting dates based on conditions
- Deployed live at www.theweatherrack.com

Developer Portfolio | Django · Railway

- Personal portfolio site built and deployed in Django showcasing projects, skills, and contact information
- Live at https://web-production-51199.up.railway.app/

EDUCATION

Bachelor of Science, Computer Science — University of Maryland Global Campus In Progress

Associate of Applied Science — WSU Tech 2019 – 2021
Aviation Maintenance Technology
