

JEREMIAH EMRICH

Python Backend Developer · Full-Stack Django · AI/LLM Engineer

Haven, KS (Open to Remote) · jemrich.dev · github.com/jemrich18 · linkedin.com/in/jeremiah-e-064bb0391

PROFESSIONAL SUMMARY

Self-driven Python backend and full-stack developer with 11 deployed production applications built and maintained independently in under 12 months. Specializes in Django REST APIs, PostgreSQL, and AI/LLM integrations using LangChain and LangGraph. Shipped two production AI tools — a RAG-powered job match engine and a multi-node LangGraph agent — plus a live client booking platform. FAA-certified Airframe mechanic background adds domain depth in data interpretation and safety-critical systems. Seeking a remote Python or backend role to ship real products and grow fast.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML, CSS

Backend: Django, Django REST Framework, REST API design, PostgreSQL, SQLite, JWT/token auth, server-side architecture

AI / LLM: LangChain, LangGraph, OpenAI API, RAG pipelines, ChromaDB, vector search, structured output, prompt engineering

Frontend: React, Vite, responsive UI, data visualization, Streamlit

Infrastructure: Railway, Docker, AWS, Git, GitHub Actions, CI/CD pipelines

Testing: pytest, unit testing, test planning

Data: Pandas, NumPy, Scikit-learn, Plotly, Jupyter Notebook

AI Dev Tools: Claude Code, GitHub Copilot, Cursor

PROJECTS

Job Application Assistant (AI) — *Django · LangChain · OpenAI · ChromaDB · Railway* Apr 2026

- Built and shipped a production RAG application at fitformyrole.com — users upload a resume and job posting to receive a match score, skill gap analysis, and a GPT-4o-mini generated cover letter with structured output
- Architected full LLM pipeline: PDF parsing → vector embeddings → ChromaDB retrieval → OpenAI completion; demonstrates end-to-end AI product ownership from data ingestion to deployed REST API

Hunting AI Assistant (AI Agent) — *Django · LangGraph · LangChain · OpenAI · Railway* Apr 2026

- Engineered a LangGraph state machine agent at aihuntingchat.com routing plain-English queries across 10+ topic domains — live weather tools, vector-store knowledge base Q&A, and persistent conversation memory
- Designed hallucination-prevention architecture for regulation-sensitive hunting topics; production agentic AI system deployed and maintained independently end to end

WeatherRack — *Django · Open-Meteo API · PostgreSQL · Railway* Mar 2026

- Integrated Open-Meteo REST API with multi-variable scoring logic across wind, barometric pressure, temperature, and moon phase to rank optimal hunting days; live at theweatherrack.com
- Full location management, responsive dark-mode UI, Railway deployment with custom domain and PostgreSQL backend

FAA Aviation Incident Dashboard — *Python · Pandas · Plotly · Streamlit*

May 2026

- Built an interactive analytics dashboard analyzing 39,000+ NTSB aviation incident records — dynamic filters, KPI metrics, trend analysis, and a US choropleth map with real domain expertise as an FAA-certified A&P mechanic

Budget App — *Django REST Framework · React · PostgreSQL · Railway*

Jan–Mar 2026

- Full-stack personal finance tracker — DRF backend with REST API, JWT token auth, and full CRUD endpoints; React frontend with expense visualization and chart breakdowns
- Includes pytest unit test suite and GitHub Actions CI/CD pipeline; continuously deployed to Railway

GolfBros — *Django REST Framework · React · PostgreSQL · Railway*

Feb 2026

- Full-stack golf community platform at golfbros.org — players log rounds, share course reviews, and track performance; DRF backend with user authentication and full CRUD, React frontend with integrated server-side logic

EXPERIENCE

Freelance Web Developer | Self-Employed

2025 – Present

- Designed and delivered a full-stack booking platform for a paying client (erintheestie.com) — custom appointment system with approval workflow, service menu management, and mobile-optimized admin dashboard
- Owned the full SDLC: requirements gathering, iterative delivery, database schema design, server-side logic, Gmail SMTP notification integration, and ongoing maintenance
- Deployed to Railway with custom domain and PostgreSQL; collaborated directly with client to align features with real-world business needs and manage feedback cycles

EDUCATION

B.S., Computer Science | University of Maryland Global Campus

Expected 2027

Relevant coursework: Algorithms, Data Structures, Databases, Software Engineering

A.A.S. — FAA Certified Airframe Mechanic | WSU Tech

2019 – 2021

FAA Airframe & Powerplant (A&P) Certificate — safety-critical systems, technical documentation, precision diagnostics
