

Jeremiah Emrich

Haven, KS (Remote) | github.com/jemrich18 | linkedin.com/in/jeremiah-e-064bb0391

SUMMARY

Full-stack Python developer with production experience building and deploying Django REST Framework backends, React frontends, and PostgreSQL databases. Shipped six live applications — including REST API design, token authentication, full CRUD operations, and responsive UI — all within 10 months of writing first code. Comfortable across the full stack from database schema to React component. Seeking a remote full-stack developer role.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Backend: Django, Django REST Framework, REST API design, serializers, token authentication, PostgreSQL, SQLite

Frontend: React, component architecture, CRUD operations, responsive UI, chart-based data visualization

Infrastructure & DevOps: Railway, Docker, Git, GitHub, pull requests, CI/CD, cloud deployment

Testing & Workflow: pytest, unit testing, GitHub Actions, CI/CD pipelines, Git workflow, agile development, code review

AI Integration (Bonus): OpenAI API, LangChain, RAG pipelines, LangGraph — production AI features built on top of full-stack apps

Data: Pandas, NumPy, Scikit-learn, Jupyter Notebook

PROJECTS

Budget App | *Django REST Framework, React, PostgreSQL, Railway* Jan 2026 – Mar 2026

- Built a full-stack budget tracker with a DRF backend — REST API design, serializers, token authentication, and full CRUD endpoints for expenses and categories
- React frontend with component architecture, expense visualization via chart breakdowns, and responsive UI across device sizes
- Used pytest for unit testing DRF endpoints; deployed to Railway with PostgreSQL and CI/CD pipeline

GolfBros | *Django REST Framework, React, PostgreSQL, Railway* | www.golfbros.org Jan 2026 – Feb 2026

- Full-stack golf community platform — players log rounds, share course reviews, and track performance over time
- DRF backend with user authentication, serializers, and full CRUD for posts and rounds; React frontend with responsive UI
- Deployed to Railway with PostgreSQL database; live at golfbros.org

WeatherRack | *Django, Open-Meteo API, PostgreSQL, Railway* | www.theweatherrack.com Mar 2026 – Apr 2026

- Integrates Open-Meteo REST API to pull 10-day forecast data and applies multi-variable scoring logic across wind, pressure, temperature, and moon phase
- Features location management, moon phase data, and a responsive dark-mode UI; deployed to Railway at theweatherrack.com

Archery Answers | *Django, PostgreSQL, Railway* Mar 2026 – Mar 2026

- Domain-specific arrow ballistics calculator — users configure shaft, point, and fletching to get kinetic energy and momentum results
- Users save and compare custom builds; PostgreSQL-backed with Railway deployment

Job Application Assistant (AI) | *Django, LangChain, OpenAI, ChromaDB, Railway* | fitformyrole.com Apr 2026 – Present

- Full-stack AI application — Django backend serves a RAG pipeline that parses resume PDFs, embeds into a vector store, and retrieves context to score job match percentage and generate cover letters
- Demonstrates full-stack ownership: PDF parsing, OpenAI API integration, structured output, and production deployment with custom domain

Hunting AI Assistant (AI) | *Django, LangGraph, LangChain, OpenAI, Railway* | aihuntingchat.com Apr 2026 – Present

- Full-stack LLM application — Django backend powers a LangGraph state machine agent with multi-node query routing and a structured knowledge base across 10+ topic domains
- Deployed to Railway with custom domain at aihuntingchat.com; demonstrates ability to ship AI-powered full-stack products end to end

End-to-End Personal Finance Analysis | *Python, Pandas, SQLite, Scikit-learn* Jul 2023 – Aug 2023

- Full data pipeline from raw CSV through SQL analysis, visualization, and linear regression forecasting — demonstrates backend data handling and analysis skills

EDUCATION

Bachelor of Science, Computer Science — University of Maryland Global Campus *Expected 2026*
Relevant coursework: Algorithms, Data Structures, Databases, Software Engineering

Associate of Applied Science — WSU Tech *2019 – 2021*
